

The graph illustrates the growth of the network size (number of nodes) over time for different algorithms. The 'smooth' algorithm maintains a stable network size, while others like 'quick' and 'radi' show a gradual increase. The 'bott' algorithm shows a sharp increase in nodes around 10,000 seconds, reaching a plateau near 10^4.

Time (s)	smooth	quick	radi	bott	other algorithms
100	~316	~316	~316	~316	~316
500	~316	~316	~316	~316	~316
1000	~316	~316	~316	~316	~316
5000	~316	~316	~316	~316	~316
10000	~316	~316	~316	~316	~316
50000	~316	~316	~316	~316	~316
100000	~316	~3160	~3160	~31600	~3160
