

The graph displays the number of nodes in the graph for various algorithms as a function of the number of nodes in the input graph. The x-axis is logarithmic, ranging from 100 to 100,000. The y-axis is linear, ranging from 0 to 100. All algorithms show a constant number of nodes, approximately 10, across the entire range of input sizes. The legend lists the following algorithms: bito, bott, com, cou, hea, inse, men, odd, quic, radi, she, and smo.
