

The graph displays the number of nodes in the search tree for various algorithms across three problem sizes: 100, 500, and 1000. The 'smooth' algorithm (red line with diamond markers) shows a significant increase in nodes as the problem size increases, while other algorithms remain relatively stable.

Algorithm	100	500	1000
smooth	~1.5e6	~2.5e6	~3.5e6
other algorithms	~1e5	~1.5e5	~2e5
