

The figure is a line plot with a logarithmic x-axis and a linear y-axis. The x-axis represents the number of nodes, with major ticks at 100, 500, 1000, 5000, 10000, 50000, 100000, and 500000. The y-axis represents the number of edges, with major ticks at 0, 20, 40, 60, 80, and 100. A horizontal red line is drawn at y=100, with red star markers at each x-axis tick. This indicates that the number of edges is constant at 100 for all values of nodes shown.

Number of Nodes	Number of Edges
100	100
500	100
1000	100
5000	100
10000	100
50000	100
100000	100
500000	100
