

The plot shows that the number of iterations required for convergence is constant (approximately 25) across the entire range of node counts from 100 to 500,000. This is represented by a horizontal red line with markers at each data point.

Number of nodes	Iterations
100	25
500	25
1000	25
5000	25
10000	25
50000	25
100000	25
500000	25
1000000	25
5000000	25
